NAME

hipstopgm - convert a HIPS file into a PGM image

SYNOPSIS

hipstopgm [*hipsfile*]

DESCRIPTION

This program is part of Netpbm.

hipstopgm reads a HIPS file as input and produces a PGM image as output.

If the HIPS file contains more than one frame in sequence, **hipstopgm** will concatenate all the frames vertically.

HIPS is a format developed at the Human Information Processing Laboratory, NYU.
