Pbmmake User Manual

pbmmake

Updated: 13 December 2003
Table Of Contents

NAME

pbmmake - create a blank bitmap of a specified size

SYNOPSIS

pbmmake [**-white**|**-black**|**-gray**] *width height*

You can abbreviate any option to its shortest unique prefix.

DESCRIPTION

This program is part of Netpbm.

pbmmake produces a PBM image of the specified width and height, either all black, all white, or a dithered gray. The default is white.

OPTIONS

In addition to the usual **-white** and **-black**, this program implements **-gray**. This gives a simple 50% gray pattern with 1's and 0's alternating.

SEE ALSO

pgmmake, ppmmake, pbm
