NAME

pbmtomrf - convert a PBM format image to MRF

SYNOPSIS

pbmtomrf [*pbmfile*]

DESCRIPTION

This program is part of Netpbm.

pbmtomrf converts a PBM image to MRF format.

For more information about mrf, see the MRF specification.

pbmtomrf takes the PBM image from the file named by the *input.pbm* argument, or Standard Input if you don't specify *input.pbm*. The output goes to Standard Output.

The compression of the edges of pictures with width and/or height not an exact multiple of 64 is not optimal in all cases.

OPTIONS
