NAME

pgmnoise - create a graymap made up of white noise

SYNOPSIS

pgmnoise *width height*

DESCRIPTION

This program is part of Netpbm.

pgmnoise creates a portable graymap that is made up of random pixels with gray values in the range of 0 to PGM_MAXMAXVAL (depends on the compilation, either 255 or 65535). The graymap has a size of width * height pixels.
