NAME

thinkjettopbm - convert HP ThinkJet printer commands file to PBM

SYNOPSIS

thinkjettopbm [**-d**] [*thinkjet_file*]

DESCRIPTION

This program is part of Netpbm.

thinkjettopbm reads HP ThinkJet printer commands from the standard input, or *thinkjet_file* if specified, and writes a PBM image to Standard Output.

thinkjettopbm silently ignores text and non-graphics command sequences.

The **-d** option turns on debugging messages which are written to the standard error stream.

LIMITATIONS

The program handles only a small subset of ThinkJet command sequences, but enough to convert screen images from older HP test equipment.
